Research interests

Asset Pricing, Behavioral Economics and Finance, Decision Making under Risk and Uncertainty

Education

Frankfurt School of Finance & Management

Fall 2018 - Present

Ph.D. in Financial Economics

Yale University, Economics Department

Fall 2022 - Spring 2023

Visiting Assistant in Research

University of Oxford, Saïd Business School

Fall 2016 - Fall 2017

M.Sc. in Financial Economics, Distinction and Dean's List

Frankfurt School of Finance & Management

Fall 2011 - Spring 2015

B.Sc. in Management, Philosophy & Economics, 93.25% and Dean's List

Nanyang Technological University, Singapore

Fall 2013

Exchange student in Mathematical Economics

Job market paper

Investor beliefs and asset prices under selective memory (Available here)

I present a consumption-based asset pricing model in which the representative agent forms Bayesian beliefs based on selectively recalled observations. The agent is more likely to recall past fundamentals that resemble current fundamentals. This similarity-weighted selective memory jointly explains important facts about belief formation, survey data, and realized asset prices. Subjective expectations overreact and are procyclical, the subjective volatility is countercyclical, and the subjective risk premium has a low volatility. In contrast, realized returns are predictably countercyclical, highly volatile, and unrelated to variation of objective risk measures. My results suggest that human memory can simultaneously account for individual-level data and aggregate asset pricing facts.

Working papers

Eliciting Stopping Times (joint with Sebastian Ebert; Available here)

We propose an experimental method to elicit stopping times—each subject's complete contingent plan for taking a risk for up to five times—to study repeated risk-taking under precommitment. In addition to time- and outcome-contingent risk-taking, we allow some subjects to use path-dependent or randomized stopping times. Our experimental design thus allows for hundreds of different risk-taking plans. Using an unsupervised machine-learning algorithm, we find that individuals' risk-taking strategies map well to stop-loss, take-profit, or buy-and-hold strategies. Most strategies are of a continue-when-winning and stop-when-losing type, with a profit-trailing stopping barrier. Path-dependence and randomization are used extensively, even if they are costly. We further analyze dynamic consistency in a sequential risk-taking task and find that subjects largely follow the unconstrained plans that we elicited.

Learning and strategic trading in ETF markets (Available here)

Designated broker-dealers arbitrage away differences between the market price of an ETF and the net asset value of the underlying assets. Using a dynamic strategic trading model, I show that this arbitrage mechanism increases long-term price informativeness but reduces short-term price informativeness. The information contained in the ETF price leads to additional learning, which improves

long-term price informativeness. However, traders informed about the value of an underlying asset use their informational advantage to forecast arbitrage-induced price changes of all other assets contained in the ETF. The predictability of future price changes induces speculative cross-asset trading, which reduces short-term price informativeness. Thus, regulation targeting ETFs must balance short- and long-term price informativeness.

Presentations	
2023	9th HeiKaMaxY, BNN-FM-MA PhD Conference, Frankfurt School Brownbag Seminar, SEF Conference Sofia,
2022	FTG Summer School, University of Heidelberg (scheduled) Yale Microeconomic Theory Breakfast, Yale SOM Finance Breakfast, 15th RGS Doctoral Conference in Economics
2021	3rd Future of Financial Information Conference, Market Microstructure Summer School, NOVA Business School Finance PhD Pitch Perfect
2020	Frankfurt School Brownbag Seminar
Awards	
2023	AFA Student Travel Grant for the Annual Meeting in New Orleans
2018	Dean's List, Saïd Business School
2015	Dean's List, Frankfurt School of Finance & Management
2012 - 2017	Scholarship of the Konrad-Adenauer Foundation (academic merit)
Research positions &	teaching experience
Since Spring 2022	Researcher
	Chair of Economic Theory I (Sebastian Ebert), Heidelberg University
Fall 2020	Lecturer Foundations of Finance (Master level)
Spring 2020	Teaching Assistant for Sebastian Ebert (Behavioural Models, Economics & Philosophy)
Fall 2019	Teaching Assistant
	for Markus Dertwinkel-Kalt and Andreas Grunewald (Business Economics)
Spring 2017	Research Assistant
	Centre for Experimental Social Science (CESS), Nuffield College, University of Oxford
Summer school	
2023	Finance Theory by the Finance Theory Group Experimental Finance by the Society for Experimental Finance
2022	Behavioral Finance by Nicholas Barberis
2021	Market Microstructure by Thierry Foucault & Albert Menkveld
Professional experien	ce
2015 - 2018	Digital Finance Argonauts , Frankfurt, Germany <i>Co-Founder</i> , Venture Capital and Investment Banking Advisory
2017	Macquarie Capital, Frankfurt, Germany Summer analyst, Mergers & Acquisitions
2014	Rocket Internet, Bangkok, Thailand Summer analyst, Business Development at Foodpanda (Delivery Hero)
2013	Armira Partners, Munich, Germany Spring analyst, Private Equity

Extracurricular activities

2017 - present	Member of the supervisory board of Talentschmiede Unternehmensberatung AG
2023	Volunteering work at Projeto Lontra, Florianopolis, Brazil (2 weeks)
2020 - 2022	Member of Global Shaper's Frankfurt, an initiative of the World Economic Forum;
	Co-lead of a project focused on teaching 21st century skills to underprivileged
	youth

Programming skills

Python (Data Science Stack), oTree (JavaScript, HTML, Python), MATLAB, LATEX, Mathematica
