Research Interests

Asset Pricing, Behavioral Economics and Finance, Decision Making under Risk and Uncertainty

Academic Positions

HEC Montréal Assistant Professor of Finance	Fall 2024 - Present
Heidelberg University Researcher at the Chair for Economic Theory I (Sebastian Ebert)	Spring 2022 - Fall 2023
Yale University Visiting Assistant in Research at the Economics Department	Fall 2022 - Spring 2023

Education

Frankfurt School of Finance & Management Ph.D. in Financial Economics, <i>Summa cum laude</i>	Fall 2018 - Summer 2024
Oxford University , Saïd Business School M.Sc. in Financial Economics, <i>Distinction</i>	Fall 2016 - Fall 2017
Frankfurt School of Finance & Management B.Sc. in Management, Philosophy & Economics, <i>93.25%</i>	Fall 2011 - Spring 2015
Nanyang Technological University , Singapore Exchange student in Mathematical Economics	Fall 2013

Working Papers

Investor Beliefs and Asset Prices Under Selective Memory ([Available here](#))

I present a consumption-based asset pricing model in which the representative agent selectively recalls past fundamentals that resemble current fundamentals and updates beliefs as if the recalled observations are all that occurred. This similarity-weighted selective memory jointly explains important facts about belief formation, survey data, and realized asset prices. Subjective expectations overreact and are procyclical, the subjective volatility is countercyclical, and the subjective risk premium has a low volatility. In contrast, realized returns are predictably countercyclical, highly volatile, and unrelated to variation of objective risk measures. My results suggest that human memory can simultaneously account for individual-level data and aggregate asset pricing facts.

Eliciting Stopping Times (joint with Sebastian Ebert; [Available here](#))

We study how individuals plan dynamic risk-taking by eliciting stopping times—complete contingent plans of when to continue or stop taking a given risk. Despite substantial heterogeneity in stopping times, a machine-learning algorithm identifies a small number of economically meaningful strategy clusters. Many subjects use path-dependent and randomized rules, and trailing stop-loss strategies are more common than threshold strategies. Most subjects plan using forward rather than the normatively appropriate backward induction. Comparing planned stopping times with sequential risk-taking, we decompose dynamic inconsistency into the effects of memory constraints, defaults, mechanical inconsistencies induced by planning constraints, and planning as such.

Learning and Strategic Trading in ETF Markets ([Available here](#))

Designated broker-dealers arbitrage away differences between the market price of an ETF and the net asset value of the underlying assets. Using a dynamic strategic trading model, I show that this arbitrage mechanism increases long-term price informativeness but reduces short-term price informativeness. The information contained in the ETF price leads to additional learning, which improves long-term price informativeness. However, traders informed about the value of an underlying asset use their informational advantage to forecast arbitrage-induced price changes of all other assets contained in the ETF. The predictability of future price changes induces speculative cross-asset trading, which reduces short-term price informativeness. Thus, regulation targeting ETFs must balance short- and long-term price informativeness.

Presentations

2025	German Economists Abroad, EEA 2025, CEAR-RSI Household Finance Workshop (discussion), Cognitive Foundations in Finance, SITE Asset Pricing, Helsinki Finance Summit, HEC-McGill Winter Finance Workshop (discussion)
2024	WFA, NFA, Research in Behavioral Finance Conference, Canadian Junior Faculty Conference, CEAR-RSI Household Finance Workshop (discussion), CIRANO Workshop
2023	9th HeiKaMaxY, Bonn-Frankfurt-Mannheim PhD Conference, Frankfurt School (2x), SEF Conference Sofia, FTG Summer School, 50th EGRIE Seminar, European Decision Sciences Day, Heidelberg University (2x)
2022	Yale Microeconomic Theory Breakfast, Yale SOM Finance Breakfast, 15th RGS Doctoral Conference in Economics
2021	3rd Future of Financial Information Conference, Market Microstructure Summer School, NOVA Business School Finance PhD Pitch Perfect
2020	Frankfurt School
2018	CEAR/ MRIC Behavioral Insurance Workshop (discussion)

Awards

2025	Best paper award at the Workshop on Cognitive Foundations in Finance
2024	The Brattle Group Ph.D. Award for Outstanding Research, WFA
2023	AFA Student Travel Grant for the Annual Meeting in New Orleans
2018	Dean's List, Saïd Business School
2015	Dean's List, Frankfurt School of Finance & Management
2012 - 2017	Scholarship of the Konrad-Adenauer Foundation (academic merit)

Teaching Experience

Since 2025	Instructor Capital Markets Theory (HEC Montréal, master level)
2020	Instructor Foundations of Finance (Frankfurt School, master level) Teaching Assistant for Sebastian Ebert (Behavioural Models, Economics & Philosophy)
2019	Teaching Assistant for Markus Dertwinkel-Kalt and Andreas Grunewald (Business Economics)

Referee Activity

European Economic Review, International Journal of Forecasting, Journal of Behavioral and Experimental Finance, Management Science

Summer School

2023	Finance Theory by the Finance Theory Group Experimental Finance by the Society for Experimental Finance
2022	Behavioral Finance by Nicholas Barberis
2021	Market Microstructure by Thierry Foucault & Albert Menkveld

Professional Experience

2015 - 2018	Digital Finance Argonauts , Frankfurt, Germany Co-Founder, Venture Capital and Investment Banking Advisory
2017	Macquarie Capital , Frankfurt, Germany Summer analyst, Mergers & Acquisitions
2014	Rocket Internet , Bangkok, Thailand Summer analyst, Business Development at Foodpanda (Delivery Hero)
2013	Armira Partners , Munich, Germany Spring analyst, Private Equity

Extracurricular Activities

Since 2017	Member of the supervisory board of The Digital Workforce Group AG
2023	Volunteering work at Projeto Lontra, Florianopolis, Brazil (2 weeks)
2020 - 2022	Member of Global Shaper's Frankfurt, an initiative of the World Economic Forum; Co-lead of a project focused on teaching 21st century skills

Programming Skills

Python (Data Science Stack), oTree (JavaScript, HTML, Python), MATLAB, L^AT_EX, Mathematica
